

NEW THINKING. NEW POSSIBILITIES.

People's expectation toward individual mobility requires more than just a convenient means of transportation. The old understanding of cars has become outdated. A car represents individuals' lifestyles, and it became an integral part of their lives. At the same time, the automobile industry has experienced seismic change. Hyundai Motor Company has grown rapidly to become one of the largest automakers, backed by world class production capability and superior quality. We have now reached a point where we need a qualitative approach to bring bigger ideas and relevant solutions to our customers. This is an opportunity to move forward and we have developed a new brand slogan that encapsulates our willingness to take a big leap. Led by our new slogan and the new thinking underlying it, we will become a company that keeps challenging itself to unlock new possibilities for people and the planet.

The Hyundai i40's impressive performance comes from three advanced engines, delivering as little as 113g/km CO₂ and an amazing 4.3 Litre/100km. Some have 6-speed manual or automatic transmission. It also provides exceptional control with ABS braking and brake assist. Superb, reflexive handling comes from advanced McPherson strut and multi-link rear suspension with ESP, vehicle stability management and hill start assist. As for safety, it's all there. An advanced safety structure, up to 9 airbag system and active front headrests, have you fully covered.
